## Career Objective

Versatile IT professional with a strong foundation in both web development and infrastructure management. I am seeking a dynamic role that allows me to leverage my expertise in modern web technologies, including HTML, CSS, JavaScript, and frameworks like React and Angular, alongside my skills in Proxmox virtualization, Nginx server management, and self-hosting solutions. Dedicated to creating robust, scalable applications and systems that enhance user experiences and drive technological innovation within an organization.

## Skills

### Web Design & Development

(HTML/CSS/JavaScript)

### Backend JavaScript Frameworks

(Node.js/Express.js/Next.js)

### Database Management Systems

(MySQL/Postgres/MongoDB)

### UI/UX Design/Video

(Canva/Adobe

Photoshop/Illustrator/XD/Premier Pro)

### Frontend JavaScript Frameworks

(Angular/React.js)

### Scripting & Automation

(C/Python)

### CSS Framework

(TailwindCSS/Bootstrap)

### Virtualization & Infrastructure

(Proxmox VE/Nginx Server

Configuration/Self-hosting Applications

(Ghost, WordPress, etc.)/Docker &

Containerization)

## Projects

### Proxmox-Based Home Lab

- Set up a home lab using Proxmox VE to manage multiple virtual machines and containers for self-hosted applications like Ghost and Nextcloud.
- Managed networking and storage solutions within the Proxmox environment.

### Self-hosted Tech Blog

<https://doreturn.in/>

- Hosted a Ghost blog on an Nginx server using Proxmox and Docker containers.
- Configured reverse proxy settings for secure HTTPS access and optimized server performance.

### Bhoogool 🌐 A Search Engine

- Developed a search engine using React with routes, context, and hooks, integrating Tailwind CSS for responsive design. Implemented API calls through Rapid API to fetch and display search results dynamically.

### Qr Code Maker

- Engineered a QR Code generation tool using HTML, CSS, and the qrcode.js library, creating a user-friendly interface for generating custom QR codes on demand.

### Company landing page

- Designed and developed a responsive company landing page using TailwindCSS and ReactJs, leveraging user state management for dynamic content updates.

### My Portfolio Site

- Built a personal portfolio site with ReactJS, utilizing contexts and hooks for state management, and implemented interactive animations with Framer Motion to enhance user experience.

### Linktree Clone

- Recreated the Linktree interface using HTML and CSS, integrating Spotify widgets for seamless music playback directly from the webpage.
